

# Transportation

From passenger safety to reduced vandalism, we've got your back.

Whether you're managing depots, stations, and rail yards or responsible for fleets of vehicles and infrastructure, protecting your assets, passengers, loadouts, and staff is just the baseline. You also need to understand timelines, continue improving services, and maximize your team's efficiency.

The YourSixOS pure cloud solution supports Public Transportation as a redundant, scalable, secure, and simple-to-use platform. With remote monitoring from anywhere, integration with a wide range of sensors and access control components, and robust analytics, YourSix has your back wherever your business takes you.

Protecting investments long term with **open technology**

Eradicating downtime with **redundant architecture**

Powering simplicity with a **single pane of glass**

Growing to your needs with **unlimited scalability**

Ensuring up-to-date protection with **proactive health monitoring**

Guarding data with **modern cybersecurity protocols**

## Prioritizing Security Through Open Technology

You're responsible for the people and assets in your system. Whether that's passengers or cargo, you need to be able to not only see what's happening at all times but prove it after the fact as well.

- Deploy continuous monitoring for every viewpoint from one dashboard
- Control access to designated areas
- Detect and deter aggressive behavior with automated video and audio alerts
- Deter and prevent vandalism in real-time
- Protect carriers from unwarranted liability claims
- Establish a chain of custody with easy-to-retrieve, redundant footage
- Optimize routes based on traffic conditions
- Ensure a safe and welcoming environment in motion and at stops
- Increase routes base on volume of riders
